

BRAGG HEALTH TIPS:

Healthy Lifestyle & Exercise Banishes Ageing Effects!

Keeping active won't let you live forever, but it slows the ravages of time!

It may not be possible to have the body of a 20-year-old at 50, but it is possible for fit 50-60 year-olds to be as fit as 20-30 year-olds who don't exercise, according to researchers.

A wise tip to staying youthful is regular exercise and to eat wisely and healthy!

HAPPY, HEALTHY THANKSGIVING!

A Day to Celebrate Freedom, Peace and Health

Thanksgiving is a very important holiday, especially in the busy lives of Americans. It is a time for us to give thanks to our God, for the things He has bestowed upon us and upon our great nation! There is no nation in the world that has more to be thankful for than us.

Many at Thanksgiving have a tendency to overeat! Let's honor ourselves and our loved ones by serving healthier foods, treats and drinks at our family gatherings.
